STEAM CAMPS

by Jhazzmyn Joiner

STEAM is an acronym for Science, Technology, Engineering Arts and Math. To be competitive in the global economy, to pursue an aggressive yet sustainable development, ABC Solutions USA prepares our younger generation to embrace creativity, invention and innovation. All children, regardless of gender, race, ethnicity, or learning style, can excel in STEAM disciplines and can aspire to STEAM careers. Fall camps are just around the corner! Join us for our FUN, high-quality, engaging, and memorable Fall camps open to new & returning K-12 students.

This year, camps will be held at the following locations in Metro Atlanta + Detroit: Bamboo Detroit, Downtown Detroit Linwood Church of Christ, Detroit Atlantic Station, Midtown Atlanta.

This is an excellent way to be productive and to expand the minds of the youth. The STEAM programs are bound to make a significant change in the lives of the youth because the children are going to be learning valuable lessons that will expand their minds. Afterward, they will leave with new knowledge and the confidence to pursue their goals and dreams.

Introducing Dr. Katrina Smith

It is my pleasure to introduce the illustrious Dr. Katrina Smith. Dr. Smith attended Honolulu Pacific University where she obtained her Bachelor's in criminal justice. Then, she attended Illinois School of Professional Psychology where she received her Master's and PhD in in Clinical Psychology. She has a license in professional counseling and her clinical psychology licensure. She owns her own psychotherapy company called "Dr. Smith & Associates, LLC" and worked at Everest, until April 2015, as a psychology instructor. Dr. Smith is currently completing vocational evaluations (limited / comprehensive) for clients currently working with GVRA. Eventually, I will be able to interview her and learn more about her incredible work and contributions to society. What an inspiration!
